8. Create an infographic in Figma explaining the concept of Public Land Mobile Network (PLMN).

Aim: To create an infographic in Figma explaining the concept of Public Land Mobile Network (PLMN).

Procedure:

1. Open Figma
2. Create a new file
3. Select the Frames
4. Fill in the content that is required for presentation
5. Design Visual Elements
6. Make it Interactive
7. Add Annotations and Explanations
8. Incorporate Multimedia
9. Storyboard Animation
10. Review and edit the Prototype
11. Save and Share

Design:

iPhone 16 - 3

How a PLMN is Identified: The PLMN ID

Every mobile network globally has a unique identifier broadcasted by its cell towers. Your SIM card reads this ID to know if it's allowed to connect to that network.

The PLMN ID is a combination of two numbers:

PLMN ID=MCC+MNC

1. Mobile Country Code (MCC)

A 3-digit code indicating the country (e.g., 404 or 405 for India, 310 for the USA).

2. Mobile Network Code (MNC)

A 2 or 3-digit code uniquely identifying the specific operator within that country (e.g., Jio might use 840, Airtel might use 10 under a specific MCC).

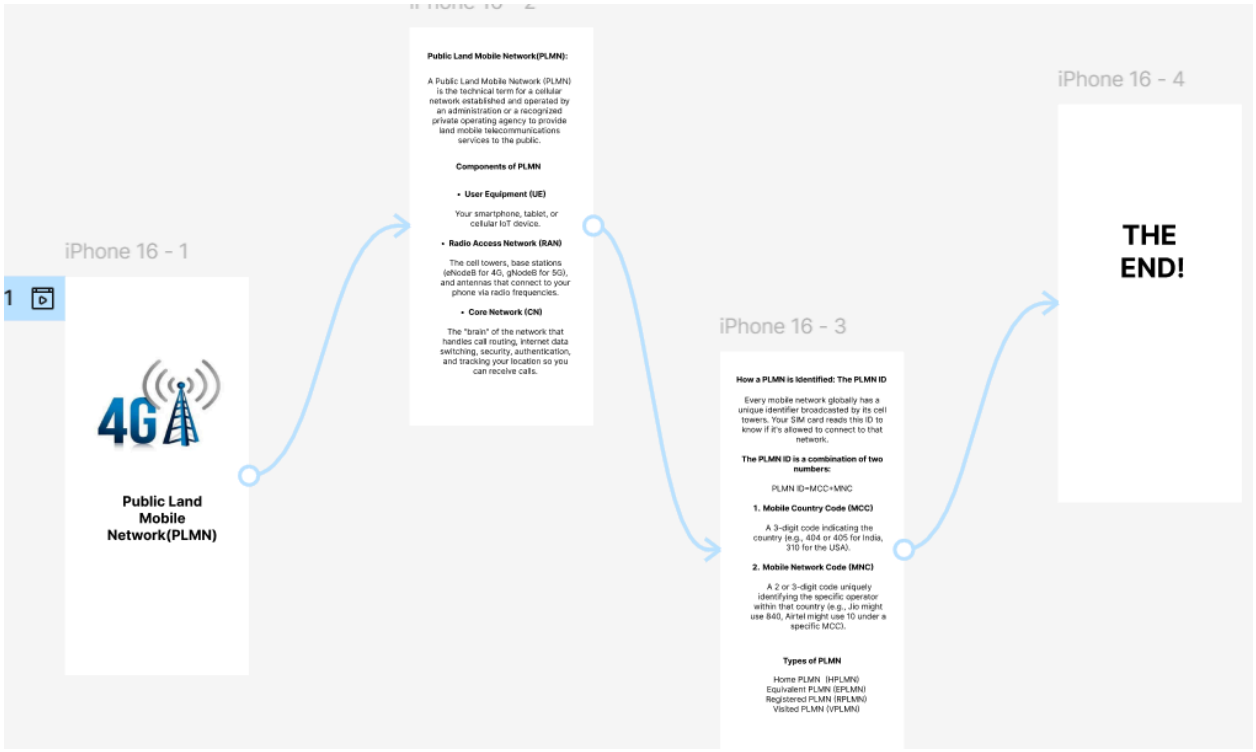

Types of PLMN

Home PLMN (HPLMN)
Equivalent PLMN (EPLMN)
Registered PLMN (RPLMN)
Visited PLMN (VPLMN)

iPhone 16 - 4

THE END!

Prototype:

Result:

Hence created an infographic in Figma explaining the concept of Public Land Mobile Network (PLMN).
