# EXP-10

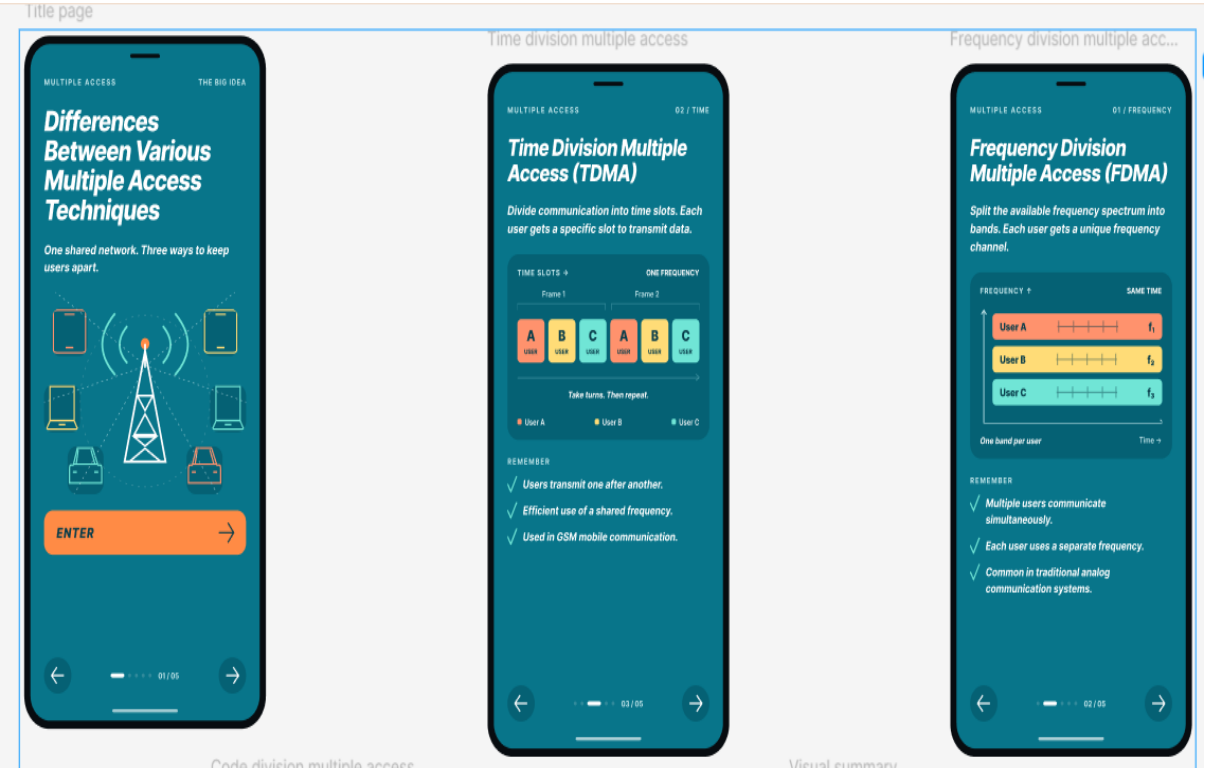

## Aim

To create a visual representation in Figma showcasing the differences between FDMA, TDMA, and CDMA multiple access techniques.

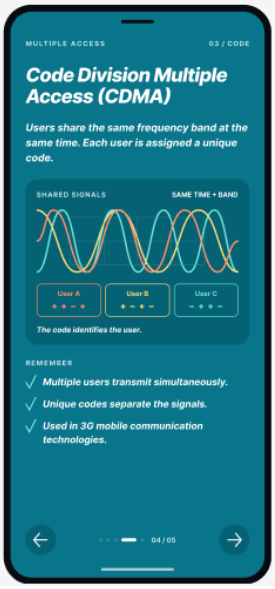

## Algorithm

1. Open Figma and create a new design.
2. Create five mobile presentation screens.
3. Add a title page with a cellular communication illustration.
4. Explain FDMA, TDMA, and CDMA using diagrams and key points.
5. Create a comparative visual summary.
6. Apply suitable colors, labels, and navigation arrows.
7. Arrange and save all screens.

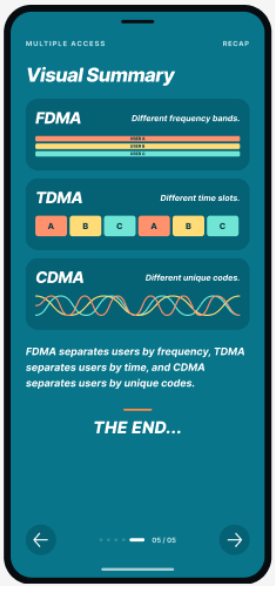

## Design

Code division multiple access

Visual summary

## Result

Successfully created a five-screen Figma presentation illustrating and comparing FDMA, TDMA, and CDMA techniques.
