EXP-9

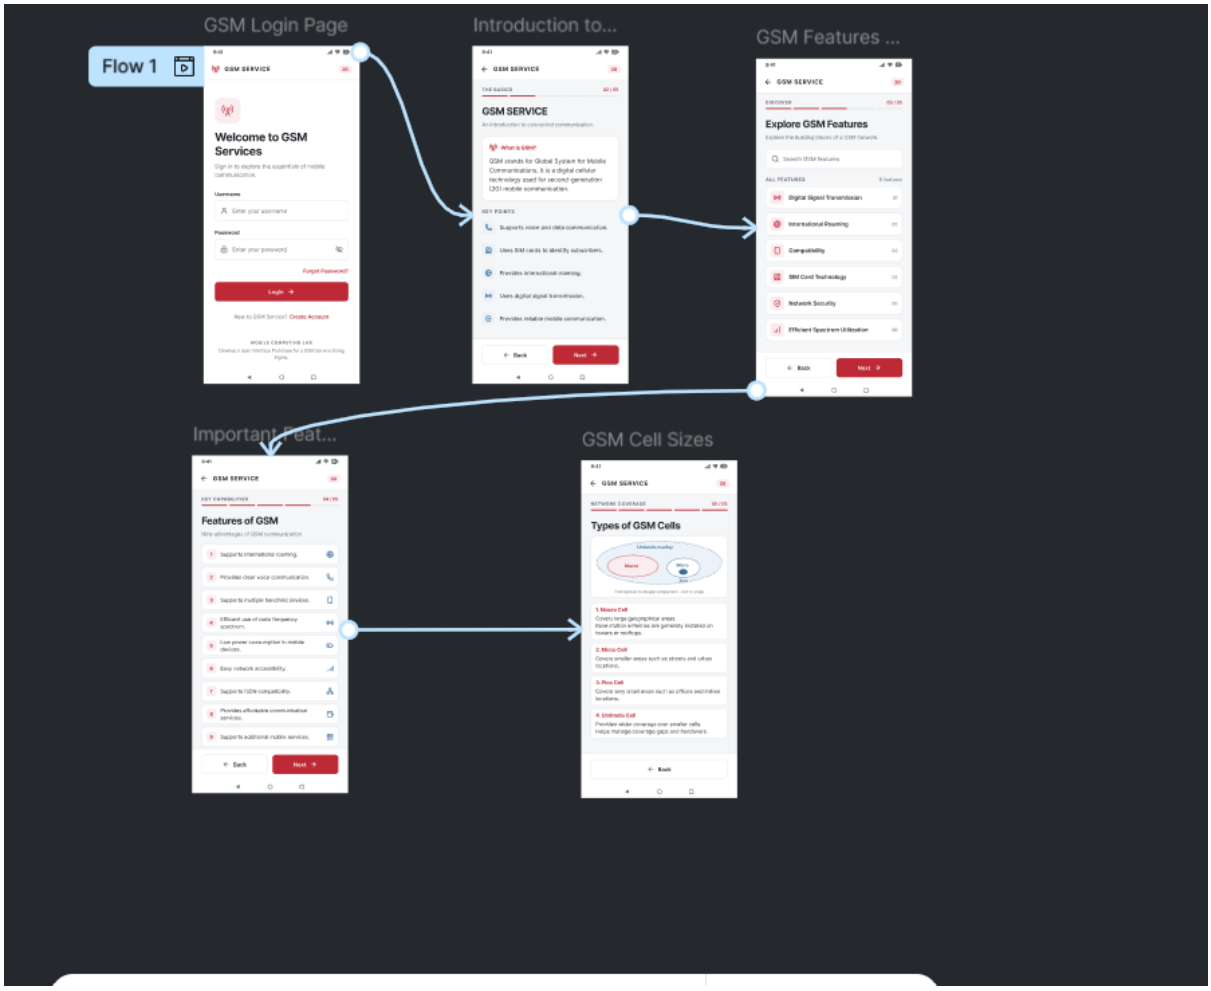

Aim

To design and develop a GSM service mobile application UI prototype using Figma, demonstrating GSM introduction, features, services, and different types of GSM cells.

Algorithm

1. Open Figma and create a new design file.
2. Create an Android mobile login screen.
3. Design a screen explaining GSM technology.
4. Create a search screen displaying GSM features.
5. Design a screen showing the important features of GSM.
6. Create a screen explaining the four types of GSM cells.
7. Add suitable icons, buttons, and text.
8. Connect all screens using prototype navigation.
9. Preview and test the application flow.
10. Stop.

Design

Result

Successfully designed and developed a five-screen interactive GSM service mobile application prototype using Figma, explaining GSM technology, its features, and different types of GSM cells.
